

Growing high-quality child care

You can help grow high-quality child care environments for young children in Kansas. At Child Care Aware® of Kansas, we sow the seeds of excellence in the early childhood field.

Every day we work to:

CULTIVATE families in their most important role of nurturing their children and balancing the demands of family and work.

NURTURE existing and prospective early childhood professionals through professional development and technical assistance to promote sturdy roots.

GROW strong communities by advancing their knowledge and focus on resources that support the development and learning of young children.

Indeed, we have a strong start, but growing these seeds of excellence takes your support.
